Discuss cases of structural heart treatment among **young, but experienced, interventionalists from different Italian centers.**

Complex successful, unsuccessful and complicated cases will be discussed. The participants interactively discuss treatment strategies of **TAVR, mitral and tricuspid valve interventions and LAA closures.**

Through the presented case the participants will increase their personal knowledge of above procedures and share experiences **how to perform interventions successfully, how to avoid failure, and how to face and avoid complications.**

Furthermore, participants are asked to propose **scientific projects** which will be discussed by the group and eventually initiated.

Featuring: MVSIC new age scientific collaboration group

Instructions: All participants need to bring 1 complex case (success or unsuccess) or a complication and propose 1 scientific project.
