MILANO CALCIUM COURSE
March 26th 2026

Led by Xthreee Learning Experience

An innovative educational experience dedicated to the treatment of calcified coronary lesions. This course introduces a new and engaging format focused on exploring the mechanisms of action of different tools through case-based discussions and four live cases performed by expert operators.

By integrating intravascular imaging findings with strategic decision-making, participants will gain a deeper understanding of how to optimize outcomes in complex coronary interventions.

Interaction, discussion, and knowledge sharing — the essence of clinical excellence — will be at the very heart of this unique learning experience.

Re-thinking Calcium
